

Dear Colleague,

We want to be a part of your eyecare team! We offer Low Vision Services for your patients.

A low vision evaluation is an extension of your primary eye care exam. Some patients may still complain of difficulty functioning with their vision even with your best prescription. Consider a referral for a low vision evaluation. There is more we can do!

We don't have to wait until a patient has severe vision impairment to get help. Early intervention is important.

Criteria for a Low Vision Evaluation:

- BCVA 20/40 or worse
- Trouble with activities of daily living such as reading, computer, driving
- Glare or photophobia
- Navigation or depth issues
- Visual field adaptations
- Any age

*Grace Tran, OD, FAAO  
Graduate of ICO  
Low Vision Residency SUNY  
and Lighthouse Int'l NY*

You know you have encountered these patients. We are in your neighborhood. We are happy to say we are accepting new patients and take many insurance plans. Please let us know how we can help.

Let's work together to serve our patients and our community!

Warmest Regards,

Dr Grace Tran and The Team at Diamond Vision Optometry
